Programming languages

- Python, Javascript, and C++
- Django, React Js, Nodes.js, MongoDB, and SQL
- HTML and CSS

Experience

- **Full-stack web developer at Ryeboard** **June 2020 - December 2020**

I was on the development team for the Ryeboard(ryeboard.com) startup company. My responsibilities included working with designers to implement UI, performance optimization, and bug fixing. I also led an effort to build a chrome extension called ryesnap that allows users to save websites as cards in ryeboard. Currently, the extension has 27 active users.

Education

Korea University, BS Electrical engineering

March 2018 - March 2022

Relevant coursework: Object-oriented programming, Computer architectures, computer languages, and data structures and algorithms.

Certification and Awards

- CS50 completion certificate - Harvard University
- Problem-solving with C++ - Hackerrank
- 2021 Hashcode participation certificate

Projects

- **Task manager**
 - I built a task management application using **Flask**, **HTML**, and **CSS** as my final project in CS50 course by Harvard.
- **Slack clone**
 - I built a slack clone using **React Js** and **firebase**. The purpose was to practice and level up my front-end development skills.
