Programming languages

- Python, Javascript, and C++
- Django, React Js, Nodes.js, MongoDB, and SQL
- HTML and CSS

Experiencer

- **Full-stack web developer at Ryeboard**   **June 2020 - December 2020**
  - I was on the development team for the Ryeboard(ryeboard.com) startup company. My responsibilities included working with designers to implement UIs, performance optimization, and bug fixing.
  - I also led an effort to build a chrome extension called ryesnap that allows users to save websites as cards in ryeboard. Currently, the extension has 27 active users.

Education

Korea University, BS Electrical engineering   **March 2018 - March 2022**

Relevant coursework: Object-oriented programming, Computer architectures, computer languages, Internet programming, Pattern recognition, and Data structures and Algorithms

Certification and Awards

- CS50 completion certificate - Harvard University

Projects

- **Task manager**
  - I built a task management application using **Python, Flask**, **HTML,** and **CSS and Javascript** as my final project in a CS50 course by Harvard.
- **Vibes**
  - A music player application inspired by Youtube Music and it is built-in **Nodes.js/express, MongoDB, React, Material UI, and Redux**
- **Portfolio website**
  - I built a responsive portfolio website using **HTML, CSS,** and **Javascript**, and I hosted it on GitHub pages **https://mjthecoder65.github.io/**
- **Airbnb Front-end clone**
  - I have built a responsive Airbnb front web website using React, React-router, Material UI, and Firebase.
